

Lesson Plan-

- To what extent were outcomes achieved? How was this demonstrated by the students?

Teacher Effectiveness:

- What have you learnt from the lesson?
- What do you recommend for future lessons?
- Comment on your effectiveness in the light of the outcomes of the lesson and your self-development focus for the lesson, referring to both strengths and areas to be addressed.

Associate Teacher Feedback:

Sarah, all the children worked well through this session. You did well to remind them that they were not to come to you but to put hands up. You probably could have moved through the steps more quickly as the session took twice as long as planned. Those chn who were behind could have caught up with the helpers in the room and then the other chn would not have had to wait so long and the session would have been quicker.
